ROHINGYA ADVOCACY DAY
FEB 28 IN WASHINGTON DC

Burma is getting away with the genocide of Rohingyas. Now India and China are trying to make Bangladesh send Rohingyas back to the burning villages from which they fled. God controls the world, we don’t. We have a responsibility to act whenever and wherever genocide takes place.

Though our country has taken a positive stand in support of Rohingyas, we know it can do better. At this time, 32 congresspersons from both parties have sponsored bills in the Senate and the House addressing the atrocities in Burma. However, more congresspersons will support the bills if they hear from you. Please note that out of all the bills that are introduced, only 4% become into a law. Your support is critical.
